

Table A1. Distribution of Racial Stereotypes by Respondent Race

| Freq. of Stereotype By Respondent Race | Almost No | Few | Some | Most | Almost All | Num. Obs. |
|---|----------------------|-----------------------|------------------------|------------------------|------------------------|-----------|
| Stereotypes of Blacks | | | | | | |
| Works Hard – Latino / White | 31 / 5 (19.3/3.3) | 64 / 10 (39.8/6.6) | 51 / 61 (31.7/40.1) | 13 / 64 (8/42.1) | 2 / 12 (1.2/7.9) | 161 / 152 |
| Get Along – Latino / White | 23 / 3 (14.1/2) | 30 / 10 (18.4/6.7) | 69 / 59 (42.3/39.3) | 27 / 59 (18/39.3) | 14 / 19 (8.5/12.7) | 163 / 150 |
| Trust – Latino / White | 42 / 2 (26.2/1.4) | 49 / 12 (30.7/8.2) | 56 / 60 (35/41.1) | 11 / 54 (6.8/37%) | 2 / 18 (1.2/12.3) | 160 / 146 |
| Stereotypes of Latinos | | | | | | |
| Works Hard – Black / White | 3 / 0 (2.2/0) | 1 / 3 (.7/2) | 35 / 23 (25.2/15.4) | 47 / 84 (33.8/56.4) | 53 / 39 (38.1/26.2) | 139 / 149 |
| Get Along – Black / White | 10 / 3 (7.2/2.2) | 16 / 2 (11.6/1.4) | 53 / 46 (38.4/33.3) | 35 / 61 (25.4/44.2) | 24 / 26 (17.4/18.8) | 138 / 138 |
| Trust – Black / White | 18 / 1 (14.3/7) | 23 / 6 (18.3/4.3) | 61 / 62 (48.4/45) | 17 / 56 (13.5/40.6) | 7 / 13 (5.6/9.4) | 126 / 138 |

Note: Cell values represent the frequency of group one / group two responses to racial stereotypes of black and Latinos. The numbers in parentheses are the percentages for each group.

This table shows the frequency of responses and percentages of Latinos and whites on the stereotype indices for blacks, and the black and white responses on the stereotype indices for Latinos.

Table A2: OLS Regression Results Predicting the Extent to Which Blacks Hold Negative Stereotypes of Latinos

| Variable | Model 1 |
|---------------------------------------|----------------------|
| Education | -.2247*** (.0769) |
| Male | -.8047* (.4102) |
| Linked Fate | -.6315 (.4364) |
| Amount of Social Contact with Latinos | -.3029 (.2138) |
| Number of Latinos in Neighborhood | .0256 (.2044) |
| Constant | 12.360*** |
| N | 112 |
| F Statistic | 3.46*** |
| R-Squared | .1404 |

Note: The dependent variable, stereotypical views of Latinos, ranges in value from 3 (holding the least stereotypical views of Latinos) to 15 (holding the most stereotypical views of Latinos). Standard error estimates are in parentheses.

*** p<.01 (two-tailed test)

** p<.05 (two-tailed test)

* p<.10 (two-tailed test)

Hypothesis one concerned the factors contributing to Latino negative stereotypes of blacks. This is the same model specified for blacks. Results are discussed by not shown in the text.

Table A3. Groups Blacks, Latinos and Whites Feel they have the Most and Least in Common With

| Group Respondent has: | Respondent's Race | | |
|-----------------------------|--------------------------|--------------------------|--------------------------|
| | Black | Latino | White |
| Most in Common With | | | |
| Black | | 24 (17.4%) | 62 (45.9%) |
| Latino | 60 (49.6%) | | 30 (22.2%) |
| White | 55 (45.5%) | 108 (78.3%) | |
| Asians | 6 (4.2%) (n=121) | 6 (4.3%) (n=138) | 43 (31.9%) (n=135) |
| Least in Common With | | | |
| Black | | 75 (52.8%) | 21 (15.3%) |
| Latino | 30 (22.7%) | | 65 (47.5%) |
| White | 39 (29.6%) | 17 (12%) | |
| Asians | 63 (47.7%) (n=132) | 50 (35.2%) (n=142) | 51 (37.2%) (n=137) |

Note: Cell values represent the frequency with which members of column group report having the most in common with members of the row group.

This table shows the frequency and percentages of which group blacks, Latinos and whites feel they have the most and least in common with. The results are discussed, but not shown, in the text.
