

Medicine Health and Society Community Health Research

Students will design or implement strategies to address community health needs. Working with community mentors, the students will identify unmet community health needs, learn how non-profit organizations address these needs, and provide tools and solutions to enhance community health.

Enrollment is limited to a small number of students, so please fill out the application (front and back side of page) and return to Lynn Lentz, MHS Administrative Assistant, 230 Buttrick Hall, by April 10.

Application

NAME _____

YEAR of graduation _____

ADDRESS _____

TELEPHONE _____

EMAIL _____

1. Courses you have taken that satisfy MHS major:
2. Why are you interested in taking the community health course? What are your goals for this experience?
3. Please describe two examples of community health or community service work in which you participated. How were you involved? What worked well? What two things did the experience teach you?
4. In our experience, the students who excel in community health initiatives are flexible self-starters, well organized, and good communicators. Do you have these or other special skills that you can bring to a community project? Please describe.
5. You will spend at least 4-5 hours per week during the day in a community setting. Please indicate any schedule conflicts that must be addressed.

6. Please provide the names, addresses, phone numbers and e-mail addresses of three references. Indicate how they know you.

7. Please suggest some times that you are available for an interview, on April 14, 15, or 16.

Thank you
